

Investors Roadmap

The Foundations in Finance Financial Literacy website *Investors Roadmap* uses a three-prong target audience: students, parents and teachers. The student section, built around the concept of an Investment Roadmap, contains the following financial literacy components: 'Do you have Budgeting Basics?' ; Test your Investment Skills; Get Smart (education planning); Investing 101 (investment terminology); 'Compound it!' and Debt Alert (credit awareness). The student portion of the website is built around an interactive forum which encourages students to think critically about their spending, future plans and financial goals. The Parent section focuses on financial literacy strategies parents can use with their children.
